1.Introduction:

The Thesis Progress Tracker is a desktop application developed for Epoka University to streamline and digitize the process of managing student thesis work. The system provides a centralized platform where students can track the progress of their thesis phases, supervisors can monitor and provide feedback on student submissions, and administrators can manage deadlines, user accounts, and overall system configuration.

This documentation presents the key features and interface screens of the application, organized by user role. Each section includes annotated screenshots that illustrate how the system functions in practice.

1.1 User Roles

The application supports three distinct user roles, each with a tailored set of permissions and views:

- Student – Tracks thesis phases, uploads documents, views deadlines and feedback, and communicates with their supervisor.
- Supervisor – Reviews student submissions, provides written feedback, schedules meetings, communicates with the students, and monitors student progress.
- Administrator – Manages user accounts, assigns roles, oversees all system activity, and ensures the platform operates correctly.

2. System - Login Page

The Login Page serves as the entry point to the Thesis Progress Tracker application. All users: students, supervisors, and administrators can access the system through a single unified login page.

Users must enter their registered email address and password to sign in. A note at the bottom of the form informs users that accounts are created by the administrator, meaning self-registration is not available, this ensures controlled access to the system.

Figure 3: Login – Incorrect Password

The authentication system validates user credentials and handles invalid login attempts by displaying informative error messages for incorrect emails or passwords.

3.Student Dashboard

Once logged in, students have access to a left-hand navigation menu with the following sections: Home, Submissions, Deadlines, Thesis Progress, Messages, Meetings, Notifications, and My Profile. This section covers the core features available to the student role.

Figure 4: Home Page

3.2 My Submissions:

The Submissions page allows students to upload thesis versions for their supervisor to review and track the full history of all past submissions. At the top, an "Upload Thesis Version" form provides an optional comment field and a "Choose File (PDF)" button where the student can choose the pdf file that they want to submit, followed by an "Upload" button to submit the document.

In the upload form, a "Submission History" table displays every version the student has previously submitted, with columns for Version, File Name, Type, Size (KB), Status, and Submitted date and time.

Figure 5: Student - My Submissions

When a student clicks on a submission from their history, they are taken to the Thesis Submission Feedback panel. On the left, the submitted thesis document is rendered as a paginated in-app preview, allowing the student to see exactly what was submitted. On the right, the "Supervisor's Feedback" panel shows the submission details: student name, version, file name, submission date, status, and an optional description field.

Below the details, a "Detailed Feedback" section displays any written comments the supervisor has submitted. In the example, the status is "Pending" and the feedback area reads "No feedback has been provided yet," indicating the supervisor has not yet reviewed this version. Once feedback is submitted, it will appear in this section for the student to read.

Figure 6: Student - Submission Preview

3.3 Thesis Progress:

The Thesis Progress page is the central hub for students to monitor and update the status of their thesis work. It is divided into two main views: one for when work is just beginning, and one reflecting a fully completed thesis.

When a student first accesses the Thesis Progress page, or when no phases have been started yet, the overall progress is displayed as 0%. The circular progress indicator at the top shows "0 of 6 phases complete." The Final Submission Deadline panel on the right shows "No deadline set yet," indicating the administrator has not yet assigned one.

Figure 7: Thesis Progress

As the student completes each thesis phase, the overall progress percentage updates dynamically. In the fully completed state shown below, the progress ring displays 100% with all 6 of 6 phases marked as "Done." The Final Submission Deadline panel now shows the assigned date of 2026-06-25, with a countdown indicating 40 days remaining, displayed in green to signal that submission is still within the allowed timeframe.

Figure 8: Thesis Progress – Completed

Once all phases are marked as complete, the system unlocks the Final Submission section at the bottom of the Thesis Progress page. This section displays each of the six completed phases (Abstract, Introduction, Literature Review, Methodology, Results, and Conclusion & Final) with a green checkmark and "Done" label. At the end after completing all the phases, the student can submit their final paper.

Figure 9: Thesis Progress - Final Submission

3.4 Submission Deadline:

The Deadlines page gives students a clear and focused view of their final thesis submission deadline. A highlighted card displays the deadline date, in Figure 5 it is displayed (2026-06-25), the number of days remaining (40 days), and a green progress bar representing time elapsed since the deadline was set.

If the student has not yet submitted their thesis, an orange advisory message at the bottom of the card reads: "You have not submitted yet. Go to Thesis Progress to upload." This provides a direct prompt, encouraging the student to navigate to the Thesis Progress page to complete their submission.

Figure 10: Submission Deadline

3.5 Messages:

The Messages page provides students with a direct communication channel to their assigned supervisor. The page displays the supervisor's name and both the student and the supervisor can edit, delete and reply to a message as demonstrated in Figures 11, 12, 13, and 14.

Figure 11: Edit Message

Figure 12: Message Edited

Figure 13: Delete a message

Figure 14: Reply to a message

Each message sent by the student appears on the right side of the screen in a light green bubble, along with a timestamp. The student can also switch to the "Files" tab to view any documents that have been shared within the conversation.

Figure 15: Messages

3.6 Notifications:

The Notifications page aggregates all system alerts and updates relevant to the student in one place. Notifications are organized chronologically (most recent first) and can be filtered using three tabs at the top: All, Meetings, and Submissions. A "Clear All" button on the top right allows students to dismiss all notifications at once.

Figure 16: Notifications

3.7 Meetings:

Figure 17: Meetings

The Meetings page allows students to request, update, and manage meetings with their supervisor. At the top of the page, a "Request / Update Meeting" form contains three input fields: Title, Date (in YYYY-MM-DD format), and Time (in HH:MM format). In the form are four action buttons: "Request Meeting", "Update Meeting", "Delete Meeting", and "Clear Past Meetings". The lower section, "My Meetings," displays a table listing all meetings associated with the student, showing the Title, Date, Time, Status, and assigned Supervisor.

3.8 Video Tutorial – Need Help?

Figure 18: Tutorial Video - Need Help?

This section provides students with access to an instructional video designed to guide them through the system. The video features step-by-step instructions accompanied by subtitles.

4. Supervisor's Dashboard:

The supervisor module enables academic supervisors to monitor student progress, review thesis submissions, schedule meetings, communicate with students, and manage thesis deadlines. The module was designed to simplify supervision workflows and improve interaction between supervisors and students.

4.1 Home Page:

Figure 19: Supervisor - Home page

4.2 Submission Review:

The Reviews page is where supervisors access and review all thesis documents submitted by their students before they submit the final versions. The "Student Submissions" table lists each submission with the following columns: Student name, Version, File name, Type, Size (KB), Submitted date and time, and Status. In the example below, a submission is shown with a status of "Pending," indicating it has not yet been reviewed.

Figure 20: Supervisor - Submission Review

Figure 21: Thesis Document Preview

Clicking "Open Review Preview" opens the Thesis Submission Review panel, a split-screen interface designed to streamline the feedback process. On the left side, the submitted thesis document is rendered as a paginated preview directly within the application, allowing the supervisor to read through the student work without switching to an external PDF viewer.

On the right side, the "Supervisor Feedback" panel displays key submission details: student name, version, file name, submission date, status (Pending), and file size. Below the details, a text area labeled "Write Feedback for Student" allows the supervisor to write their review. Three action buttons are available: "Submit Feedback", "Approve", and "Reject". A "Close" button on the far right dismisses the panel and returns to the submissions list.

4.3 Submission Deadline:

The Deadlines page allows supervisors to view and update the final thesis submission deadline for their students. A date input field labeled "New date (YYYY-MM-DD)" and an "Update Deadline" button allow the supervisor to change the deadline at any time.

Figure 22: Supervisor - Submission Deadline

An informational note below the form states that students will automatically receive a reminder notification the day before the deadline, removing the need for manual reminders. The lower section, "Student Submission Status," lists each assigned student along with their current submission status. In the example below, both Kejtlin Bushi and Serena Korbi are shown as "Not submitted yet."

4.4 Thesis Progress:

The Thesis Progress page enables supervisors to monitor the academic progress of any individual student. A "Select Student" dropdown at the top lets the supervisor choose which student to view, followed by a "Load Student" button. Once loaded, the page displays the selected student name, overall progress percentage, and the status of each of the six thesis phases (Abstract, Introduction, Literature Review, Methodology, Results, Conclusion).

Below the phase tracker, the supervisor can also view or update the individual submission deadline for that specific student. Finally, a "Final Submission" section indicates whether the student has submitted their thesis yet.

Figure 23: Supervisor - Thesis Progress

4.5 Meetings:

The Meetings page gives supervisors full control over scheduling and managing meetings with their students. The "Schedule / Update Meeting" form at the top includes fields for selecting a student, entering a title, date, time, and location. Five action buttons are available: "Schedule Meeting", "Update Meeting", "Cancel Meeting", "Approve Meeting", and "Clear Past Meetings". The "All Meetings" table below displays every meeting associated with the supervisor across all students, including the student name, meeting title, date, time, status, and location.

Figure 24: Supervisor - Meetings

4.6 Messages:

The supervisor Messages page functions similarly to the student version but includes a "Select Student Conversation" dropdown at the top, allowing the supervisor to switch between conversations with different assigned students. Once a student is selected, their name and availability status are displayed, and the chat history is loaded. The supervisor can reply using the text input field at the bottom, with options to attach files and send messages. The "Files" tab is also available to review any shared documents.

Figure 25: Supervisor – Messages

4.7 Notifications:

The supervisor Notifications page follows the same layout as the student version, chronological alerts filterable by All, Meetings, and Submissions tabs, with a "Clear All" button. However, the notifications received reflect supervisor-relevant events rather than student-facing ones. The types of notifications a supervisor receives include: New Thesis Submission (when a student uploads a thesis version), Meeting Request (when a student requests a meeting, showing the topic), and New Message (when a student sends a message in the chat).

Figure 26: Supervisor - Notifications

5. System Administrator:

Upon login, the System Administrator is presented with the Admin Dashboard, a system overview showing five summary cards: Students, Supervisors, Submissions, Meetings, and Milestones.

Figure 27: Administrator - Home Page

5.1 The User's Page:

The User's page is where the administrator creates, edits, and deletes user accounts. At the top, a "Create New User" form contains four fields: Full Name, Email, Password, and a Role dropdown (defaulting to "student"). Clicking the green "+ Create User" button registers the new account. Below the form, the "All Users" table lists every registered user in the system with their ID, Name, Email, Role, and account creation timestamp. Each row has Edit and Delete (trash) icons on the

right. The table shows all three roles: admin, supervisor, and student, confirming that accounts are centrally managed by the administrator and not self-registered.

Figure 28: User Management

5.2 Role Assignments:

The Assignments page allows the administrator to link students to their supervisors. An "Assign Supervisor to Student" form at the top provides two dropdowns, one for selecting a student and one for selecting a supervisor, followed by a green "Assign" button. The "Current Assignments" table below shows all active pairings, listing the student's name, assigned supervisor, and the date and time the assignment was made. In the example, four students are assigned across two supervisors: Klea Luka supervises Kejtlin Bushi and Serena Korbi, while Ardita Dorti supervises Floralba Shehu and Amanda Markeci.

Figure 29: Administrator - Assignments

5.3 Meeting Schedule:

The Activity page provides the administrator with a visual weekly calendar of all student-supervisor meetings scheduled across the system. The calendar is organized by day (rows) and time slots (columns, in one-hour blocks). Each meeting is displayed as a color-coded card showing the supervisor's name, student name, and meeting time. The legend notes that each color represents a distinct student-supervisor pair. In the example, two meetings are visible: a Monday session at 12:00 between Klea Luka and Serena Korbi, and a Thursday session at 10:30 between Klea Luka and Kejtlin Bushi. This view gives the admin a complete picture of all scheduled activity without needing to query individual users.
